Audience Behavior Report

Internal Analytics Distribution
Prepared By: Audience Insights Team
Reporting Period: Q2 FY2026

Overview

This report summarizes audience viewing behavior, engagement trends, retention patterns, and platform usage across global regions during Q2 FY2026.

The primary objectives of this analysis are:

- understanding viewer engagement behavior
- identifying high-retention content categories
- improving recommendation system performance
- supporting regional growth strategies
- optimizing release schedules

Global watch activity increased significantly during Q2, particularly across mobile-first audiences in APAC markets.

Global Engagement Summary

Metric	Q1 FY2026	Q2 FY2026
Metric	Q1 FY2026	Q2 FY2026
Avg Weekly Watch Hours	4.8 hrs	5.7 hrs
Avg Session Duration	51 min	59 min
Mobile Viewing Share	49%	56%
Completion Rate	61%	64%
Returning Viewer Rate	68%	74%

The largest engagement growth occurred among viewers aged 18-34.

Viewing Time Patterns

Peak Viewing Windows

Region	Highest Activity Window
APAC	8 PM – 1 AM
North America	7 PM – 11 PM
Europe	6 PM – 10 PM
LATAM	8 PM – 12 AM

Late-night viewing sessions increased substantially among mobile users.

Analytics teams observed a strong relationship between binge-watching behavior and science-fiction content releases.

Device Usage Trends

Device Type	Share of Watch Activity
Mobile	56%
Smart TV	29%
Desktop	9%
Tablet	6%

Mobile usage exceeded smart TV engagement in APAC for the first time in company reporting history.

Genre Engagement

Genre	Avg Completion Rate
Sci-Fi	81%
Thriller	74%
Drama	68%
Fantasy	65%
Reality TV	42%

Science-fiction content generated the highest session duration and strongest subscriber retention globally.

Viewer Retention

Retention improved significantly among users who:

- completed at least one serialized series
- enabled localized subtitles
- engaged with personalized recommendations
- watched content across multiple sessions

Localized onboarding flows correlated strongly with improved 30-day retention rates.

Regional Insights

APAC

APAC delivered the highest engagement growth during Q2.

Key observations:

- mobile-first viewing dominates usage patterns
- subtitle engagement rates remain extremely high
- serialized sci-fi content significantly outperformed projections

The strongest growth markets included:

- India
 - Indonesia
 - South Korea
 - Philippines
-

North America

North America maintained stable engagement across premium subscription tiers.

Key trends:

- strong smart TV usage
- higher engagement with thriller content
- moderate decline in long-session viewing among users under 24

Average completion rates remained above platform averages for premium subscribers.

Europe

Europe showed slower engagement growth compared to other regions.

Observed issues included:

- reduced engagement with generic promotional campaigns
- lower completion rates for non-localized trailers
- increased churn among mobile-only viewers

The audience strategy team recommends stronger localization investment during Q3.

LATAM

LATAM demonstrated consistent fantasy and drama engagement growth.

Viewer behavior highlights:

- increased dubbed-content consumption
- rising mobile watch activity
- stronger evening viewing consistency

Retention metrics improved following regional subtitle quality improvements introduced during May 2026.

Binge-Watching Trends

Analytics teams identified a continued increase in binge-viewing behavior.

Common Patterns

Users were most likely to binge-watch when:

- episodes were under 50 minutes
 - cliffhanger endings were used
 - recommendations appeared immediately after playback
 - subtitles were available in native language
-

Recommendation System Impact

Users engaging with personalized recommendation rows demonstrated:

- longer session duration
- lower abandonment rates
- higher multi-series completion behavior

Recommendation-driven viewers averaged:

- 22% higher weekly watch time
 - 17% lower churn rates
-

Content Discovery

The strongest discovery channels were:

1. Personalized homepage recommendations
2. Mobile push notifications
3. Creator-led social campaigns
4. Trending content sections

Search-based discovery declined slightly relative to recommendation-driven engagement.

Behavioral Segments

Segment A – Heavy Mobile Users

Characteristics:

- ages 18-29
- high nightly viewing frequency
- strong sci-fi engagement
- high responsiveness to creator campaigns

This segment produced the highest average weekly watch time globally.

Segment B – Premium Household Viewers

Characteristics:

- smart TV usage
- family-oriented viewing behavior
- longer average sessions
- higher subscription retention

Most active in North America and Europe.

Segment C – Casual Viewers

Characteristics:

- shorter viewing sessions
- lower completion rates
- higher churn probability
- lower interaction with recommendation features

Retention campaigns will primarily target this segment during Q3.

Subscriber Churn Signals

Analytics teams identified several behavioral indicators associated with elevated churn probability.

Key indicators:

- declining session frequency
- incomplete episode viewing
- reduced homepage interaction
- absence of personalized engagement

Users experiencing poor recommendation relevance were significantly more likely to cancel subscriptions within 45 days.

Strategic Recommendations

Product Teams

- improve recommendation explainability
- optimize mobile playback stability
- reduce homepage recommendation repetition

Content Teams

- continue serialized sci-fi investment
- expand localized subtitle support
- prioritize episodic release schedules

Marketing Teams

- increase creator-led engagement campaigns
 - focus acquisition on high-retention audiences
 - improve onboarding personalization
-

Closing Summary

Q2 FY2026 demonstrated continued audience growth across mobile-first international markets, with science-fiction content and localized experiences producing the strongest engagement outcomes.

The Audience Insights Team recommends continued investment in:

- personalization systems
- regional localization
- serialized storytelling
- creator-driven audience acquisition
