

Audience Behavior Report 2025

Data Source: Internal Analytics + H1 User Surveys **Prepared by:** User Research & Data Science Team

1. Demographic Segmentation Analysis

1.1 Segment Alpha (Age 18-24)

- **Profile:** Gen Z, Digital Natives, High Social Media Activity.
- **Behavioral Pattern:** "Snackable" viewing. They prefer high-intensity content but often in short bursts. Average session length is 22 minutes.
- **Top Titles:** 'Stellar Run', 'Neon Nights', 'Urban Legends'.
- **Device Preference:** 82% use mobile devices exclusively.
- **Conversion Catalyst:** Social media "Trending" badges and peer-to-peer recommendations.

1.2 Segment Beta (Age 35-50)

- **Profile:** Urban Professionals, Families.
- **Behavioral Pattern:** "Lean-back" viewing. They prefer immersive stories with high production value. Average session length is 65 minutes.
- **Top Titles:** 'Last Kingdom', 'Golden Era', 'Ocean Whispers'.
- **Device Preference:** 70% view via Smart TVs or Home Theater systems.
- **Conversion Catalyst:** Critical reviews and "Award Nominated" status.

2. Genre Trends & Sentiment Analysis

2.1 The Rise of "Hard" Sci-Fi

- **Growth Rate:** 12% Month-over-Month (MoM).
- **User Sentiment:** 40% of positive reviews for 'Stellar Run' specifically mention "Technical Accuracy" and "Scientific Realism" as primary drivers for their 5-star rating.
- **Opportunity:** This audience is willing to pay for premium "Behind the Scenes" technical content.

2.2 The Comedy Fatigue

- **Churn Correlation:** Users who primarily watch Comedy are 25% more likely to cancel their subscription within 3 months compared to Sci-Fi viewers.
- **Feedback Trends:** Over 3,000 reviews in Q2 mentioned that recent Comedy titles felt "dated" or "not relatable."
- **Average Rating:** Comedy titles averaged 2.1/5 in Q2 2025.

3. The "Mumbai" Phenomenon: Deep Dive

Our Q2 study of the Mumbai market revealed a unique behavioral outlier.

3.1 Transit Viewing

- **The Data:** We observed a massive spike in mobile traffic originating from Mumbai IP addresses during the windows of 8:00 AM – 10:00 AM and 6:00 PM – 8:00 PM.
- **The Correlation:** This aligns perfectly with the Mumbai Metro and Local Train commute hours.
- **Engagement:** These users are not "browsing"; they are watching saved offline content or streaming with high-intensity engagement (pausing/rewinding).

3.2 Strategy Opportunity

- **Mini-Episodes:** We recommend creating 10-15 minute "Recap" episodes or "Daily Bites" specifically for the commuter segment.
- **Offline Push:** Implement a feature that automatically downloads the next episode of a user's current series when they are on Home Wi-Fi, anticipating the commute.

4. Platform Usability Insights

- **Search Behavior:** 60% of users now use "Natural Language" queries in the search bar (e.g., "movies like interstellar" rather than just "sci-fi").
- **Navigation:** Users find the "Genre" folders too broad. There is a demand for "Mood-based" categories (e.g., "Deep Thought," "Quick Laugh," "High Tension").
