

Campaign Performance Summary: H1 2025

Prepared by: Global Marketing Analytics Division **Confidentiality:** Level 2 (Managerial Access)

1. Introduction

This summary evaluates the effectiveness of our primary marketing initiatives for the first half of 2025. Our strategy centered on two distinct goals: a global brand-building exercise ('Neon Nights') and a high-intensity regional acquisition push ('Stellar Run: Mumbai Metro').

2. Campaign A: "Neon Nights" Global Launch

Target Demographic: 18-24 (Gen Z) **Primary Markets:** USA, UK, India, Japan

2.1 Channel Effectiveness & Spend

- **Instagram Reels/TikTok (40% of spend):** Highest engagement rate recorded (8.4%). Cost Per Click (CPC) was \$0.12.
- **YouTube Pre-roll (30% of spend):** Moderate effectiveness. While reach was high, conversion was 15% lower than Instagram.
- **OOH / Billboards (30% of spend):** Excellent for brand recall in major cities (NYC, London, Tokyo) but difficult to track for direct conversion.

2.2 Key Performance Indicators (KPIs)

- **Engagement Score:** 8.4/10
- **Conversion Rate:** 5.2%
- **Return on Ad Spend (ROAS):** 4.2x
- **Sentiment Score:** 78% Positive (Users praised the "Vaporwave" aesthetic and music).

3. Campaign B: "Stellar Run: Mumbai Metro Push"

Target Demographic: 18-35 (Urban Professionals) **Regional Focus:** Mumbai Metro Area (Maharashtra, India)

3.1 Tactical Implementation

This was our first "Geo-Fenced" campaign. We utilized mobile ads triggered by proximity to major metro stations (Andheri, Bandra, Colaba) during peak commute hours.

3.2 Results & Analysis

- **Regional Awareness:** 95% awareness in targeted urban centers within 30 days.
- **Sign-up Surge:** 1.2M new signups specifically attributed to the "MUMBAI2025" promo code.
- **Cost Per Acquisition (CPA):** \$8.50 (15% lower than our global average).
- **Localized Content:** The use of Marathi and Hindi dubbing/subtitles in promotional clips increased click-through rates (CTR) by 3x compared to English-only assets.

4. Cross-Campaign Insights

1. **Localization is the Key to India:** The disparity between the "Neon Nights" (Global) and "Stellar Run" (Regional) performance proves that hyper-localized assets yield significantly higher ROI.
2. **The "Commuter Window":** We discovered a "Peak Viewing Intent" window between 8:00 AM – 10:00 AM and 6:00 PM – 8:00 PM among Mumbai professionals.
3. **Influencer Strategy:** Nano-influencers (10k-50k followers) in the tech and sci-fi niche provided a 20% higher conversion rate than celebrity endorsements.

5. Future Recommendations

- **Immediate Action:** Scale the "Metro Push" model to the Delhi-NCR and Bengaluru regions for the Q3 release of 'Dark Orbit'.
- **Content Alignment:** Future trailers must be optimized for mobile-first viewing (9:16 aspect ratio), as 82% of Segment Alpha users never access the platform via desktop.
